

M&M CONTRACTORS TAKE DELIVERY OF THE FIRST BRYCE 180 PRO

MARK CRABTREE FROM NEAR HARROGATE STARTED FENCING WITH AN OLD BRYCE SUMA PROFI. AS HIS BUSINESS EXPANDED HE NEEDED ANOTHER POST DRIVER. BEARING IN MIND HOW WELL THE PROFI WENT HE BOUGHT A BRYCE MAGNUM NEARLY 3 YEARS AGO.

Mark says "it is brilliant and has never missed a beat, everything about it is good, I can't fault it and the quadshift is great for getting into awkward corners. We need speed and efficiency and that was highlighted with the Bryce machine on a 30km pipeline contract. We do work for Utility Companies as well as

private customers and you never know what is going to get thrown at you next - you need the right tools and equipment

to give you a return that makes it all worthwhile".

"Business is mental" says Mark, "we are on the go seven days a week". Mark trades as M & M Contractors and they also erect stock fencing, post and rail and hot rail horse fencing - some of their contracts extend into the North York Moors up amongst the heather. With an increasing workload they had to think of boosting their output with the same labour force so he went to Lamma 2016 and carefully studied all the different makes of tracked machines on offer. Mark says "I went for the Bryce 180 because of its features and build quality and our previous positive experience with our existing Bryce machines - one

day we can be fencing round a quarry with 6" of topsoil and another day we could be working in woodland under a canopy of branches. With its hitting power and rockspike plus low profile and the ability to slew either way, the whole lot just makes these jobs so much easier. Its speed and versatility is absolutely brilliant and we can carry up to 400mts worth of stakes on the front cradle - it's a game-changer."
